Party Crosstabs

What is a crosstab?

A crosstab shows the relationship between two questions. In other words, it can show how people who are in one category (party closest to you, in this presentation) answered other questions. Other examples which might be more familiar are gender, settlement and age.

The next few slides show how respondents for UNM, Georgian Dream, “don’t know” and “refuse to answer” are different or similar to each other.

A crosstab demonstrates the relationship between two questions. It does not show if there is a dependent relationship between those two questions.
