Public Attitudes in Georgia
Results of August 2015 survey carried out for NDI by CRRC Georgia

This research is funded by the Swedish International Development Cooperation Agency (Sida)

Laura Thornton – NDI Georgia
Koba Turmanidze – CRRC Georgia
Why We Conduct Polls?

- Foster the development of more responsive policies and governance;

- Help stakeholders diagnose and address issues of public concern;

  - Leaders from across the political spectrum have reported that the polls are important to their work and encourage continued polling;

  - Inclusive process: the polling instrument was developed in consultation with parties, government, and civil society leaders;
Information about the poll

- Fieldwork dates: August 8 – September 10, 2015
- 4,448 completed interviews
- A nationally representative sample of citizens of Georgia including Urban, Rural, East Georgia and West Georgia areas and settlements densely populated by ethnic minorities. Additionally, representative sample is present for the self-governing cities of Tbilisi, Kutaisi, Batumi, Zugdidi, Gori, Telavi, Akhaltsikhe, Ozurgeti, Mtskheta and of Gurjaani municipality.
- The average margin of error is +/- 3.01%
Methodology

Sample design
NDI and CRRC use a complex survey design:

- **Stratification** – dividing population in relatively homogenous sub-groups
- **Clustering** – randomly selecting small geographic areas for each sub-group (stratum)

- Households are selected via random route sampling
- Respondents are selected using a Kish table
- Randomly selected households and individuals are not substituted
- All interviews are conducted face-to-face, in one of the three languages – Georgian, Armenian and Azeri
How NDI Survey is Conducted

1. At the first stage, CRRC randomly selects voting precincts in Georgia. Interviewers are sent there with given starting point, directions for walking, step size, number of contacts.

2. Interviewer randomly selects households according to the given step size, e.g. every 3rd, 5th, 8th...

3. The respondent is selected randomly, with special method - so called Kish grid. Selected respondent cannot be replaced.

4. Interviewer conducts an interview with the selected household member. Interviewer uses tablet computer and a special software.

5. Interviewer submits the results via the internet to the special server.

6. CRRC cleans and analyses collected data, which later is presented to the public.
Living Conditions
Since June 2014, taking everything into account, living conditions in your city/village ... (q1)
